COMPEX ®

DONJOY®

PROCARE®

IN 1978...

Philadelphia Eagles' offensive line captain Mark Nordquist and lawyer Ken Reed founded a small company in a Carlsbad, California garage. They named the new company DonJoy® after their wives, Donna and Joy.

The first products of DonJoy® were simple support sleeves constructed of neoprene pieces stitched together and pulled over the knee, ankle and elbow joints. In 1980, the product line added an off-the-shelf rigid knee support device called the 4-point knee brace – and the timing couldn't have been better. The modern era of sports medicine was in its infancy, and products like DonJoy's were suddenly in high demand. Throughout the next two decades, the small business grew rapidly:

- In 1987, the London-based medical devices conglomerate Smith & Nephew took notice of the growing company and bought DonJoy® for \$20 million.
- In 1995 DonJoy acquired ProCare®, a leading orthopedic soft goods company.
- By the late 1990s DonJoy was generating approximately \$100 million in annual revenues.
- In 1999, the DonJoy management team arranged a leveraged buyout and changed the name from DonJoy to DJ Orthopedics. They took the company public again in 2001.

Over the next several years, DJO® grew at an unprecedented rate, acquiring all or part of seven new companies:

- Depuy® soft goods
- Orthologic® bone growth stimulation
- Durakold cold therapy products
- Axmed superior medical equipment
- Encore® orthopedic soft goods
- Aircast® bracing and support devices

Following the Aircast® acquisition in 2006, the company name changed to DJO® Incorporated to better reflect the broad range of product lines it now provided.

In 2007, the company's fortunes changed forever when the Blackstone Group purchased DJO®. Once again, DJO became a privately held company.

Blackstone merged DJO® with another Blackstone-owned company, Reable Therapeutics, which included the Empi®, Chattanooga® and Encore® product lines; the combined companies adopted the DJO name. Virtually overnight, DJO changed the orthopedic devices industry with its unrivaled offering of rehabilitation, pain therapy, physical therapy, and surgical reconstructive implants.

Over the past several years, DJO® has purchased several of its overseas distributors in key locations, including Australia, Canada, South Africa, and Tunisia. These strategic acquisitions give the company almost total control over the sales and distribution of its products in the more than three dozen countries it serves.

In the first quarter of 2019, Colfax Corporation, a publicly traded, diversified technology company, acquired DJO® as the foundation of their new strategic growth platform in the healthcare space. In 2020, DJO acquired LiteCure, followed by Trilliant, Medshape, Mathys and STAR in 2021.

KNEE & LOWER LIMB

KNEE BRACING AT THE HEART OF ENOVIS HISTORY

While knee braces are a common sight, that hasn't always been the case. The modern knee brace, used to prevent injury, has only been around since 1967.

The late 60s were important for the evolution of knee braces. In 1967, a professor of physiology, Dr. Robert F. McDavid, invented the first lateral knee brace designed to prevent injury or reinjury. His brace provided lateral protection of the knee. Then during the 1967 season and Super Bowl III, Hall of Fame New York Jets' Quarterback Joe Namath played with a now-famous knee brace. Jack Castiglia of the Lenox Hill Brace Shop with along with noted sports physician Dr. James Nicholas designed the brace. This allowed Namath to keep playing despite being plagued by knee problems. Namath's knee brace was so iconic that it is now on display at the Pro Football Hall of Fame.

During the 1970s, more prophylactic knee braces began being tested and tried by more NFL players in an effort to reduce career ending knee injuries. In 1978, Philadelphia Eagles' offensive line captain Mark Nordquist and lawyer Ken Reed founded a small company in a Carlsbad, California garage. They named the new company DonJoy® after their wives, Donna and Joy.

The first Enovis products were simple sleeves made of sewn-together neoprene that were pulled over the knee as well as the ankle and elbow joints for support. Fast forward to today where knee braces come in a variety of shapes and sizes, designed for all manner of knee injuries and prevention.

DONJOY

DELUXE HINGED KNEE

INDICATIONS

Mild to moderate medial lateral control. Ideal for patients who have allergies or sensitivity to neoprene.

CHARACTERISTICS

- Lightweight neoprene alternative fabric that allows for improved airflow
- Polycentric hinges allow for extension control 10°, 20°, 30° and 40° (10° installed) and flexion control 45°, 60°, 75° and 90°
- Fits left or right knee
- 6 month warranty

DONJOY

SPORTS HINGED KNEE

INDICATIONS

Recommended for mild compressive support to help promote healing and stabilize knee joint following sprains and ligament and/or meniscus injuries.

CHARACTERISTICS

- Provides soft tissue compression with maximum patient comfort
- Breathable Drytex® material provides an alternative to neoprene or elastics
- Removable medial/lateral aluminum dual-axis hinges
- Available in sleeve or wraparound configuration

DONJOY

PLAYMAKER XPERT

INDICATIONS

For mild medial/lateral support of the knee. For use in warmer environments.

CHARACTERISTICS

- Advanced high tenacity nylon/spandex material promotes a cooling effect while delivering a lighter and slimmer profile
- Removable polycentric hinges and aluminium uprights
- Popliteal cut-out for extra comfort in flexion
- Fits left or right knee
- 6 month warranty
- Latex-free

PROCARE

REDDIE BRACE

INDICATIONS

Ideal for mild MCL and/or LCL sprains, mild arthritis, post arthroscopic meniscectomy, or mild global instabilities.

CHARACTERISTICS

- 3mm neoprene wraparound configuration suitable for the older patient
- Removable dual axis polycentric hinges provide medial/lateral support
- Popliteal cut-out for extra comfort in flexion
- Fits left or right knee
- Available in 8 sizes XS-XXXXL
- 6 month warranty

GENUFORCE XPRT

CHARACTERISTICS

- Support and compression following acute and chronic knee injury and mild knee osteoarthritis
- Proprioceptive and neuromuscular stimulation through compression
- Mild to moderate ligament sprains
- Mild to moderate knee instability
- Mild meniscus injuries
- Prevention of injury

DONJOY

GENULAX

INDICATIONS

Support and compression following acute and chronic knee injury and mild knee osteoarthritis. Proprioceptive and neuromuscular stimulation through compression. Mild MCL/LCL sprains. Mild instability and hypermobility. Mild meniscus injuries. Prevention of injury

CHARACTERISTICS

- Removable bilateral polycentric hinges with rigid arms help offer enhanced medial/lateral stability
- Adjustable knee strapping works like functional tape to help provide added compression, stability, and a custom fit
- Anatomically contoured knee pad to aid stability of the patella, massaging effect, and to help improve proprioception
- Stretch zones over the patella and the back of the knee to aid breathability, comfort, and freedom of movement
- Low profile with non-slip silicone bands/Not made with natural rubber latex

STABILAX

INDICATIONS

Support and compression following acute and chronic knee injury and mild knee osteoarthritis. Proprioceptive and neuromuscular stimulation through compression. Mild MCL/LCL sprains. Mild instability and hypermobility. Prevention of injury

CHARACTERISTICS

- Removable semi-rigid bilateral polycentric hinges
- Adjustable knee strapping works like functional tape to help provide added compression, stability, and a custom fit
- Anatomically contoured knee pad to aid stability of the patella, massaging effect, and to help improve proprioception
- Anatomical 3D knit design to help provide effective and targeted compression (20-36mmHg, medical standard) and support
- Stretch zones over the patella and the back of the knee to aid breathability, comfort, and freedom of movement
- Low profile with non-slip silicone bands
- Not made with natural rubber latex

DONJOY

OA REACTION™ WEB

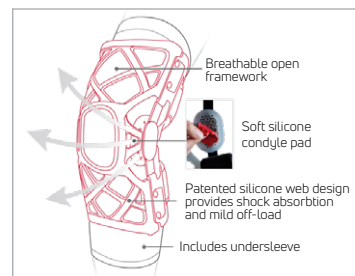

INDICATIONS

Suitable for early to mild unicompartmental osteoarthritis of the knee & patella. The ideal "first-time" choice, allowing patients to get accustomed to wearing a brace and making it easier to transition into a more rigid OA brace when the time comes. OA Reaction Web is also a good option for patients wishing to use it as a lighter alternative to their usual rigid brace.

CHARACTERISTICS

- Four way stretch wrap-around design
- Silicone web technology
- Low profile, lightweight, discreet
- Single aluminium upright
- Silicone condyle pad
- Fitted undersleeve
- Available in 7 sizes, XS-XXXL
- 6 month warranty

DONJOY

HINGED TRU-PULL

INDICATIONS

The patented Tru-Pull Hinged system is designed to place a dynamic pull on the patella during knee extension to normalise tracking in the intracondylar groove and reduce anterior pain. An ideal solution for patients requiring ultimate support for patellofemoral malalignment, subluxation and dislocations. Available with aluminium hinges for additional medial/lateral support and control of knee hyperextension.

CHARACTERISTICS

- Breathable sleeve with elastomeric traction device with pull strap above and below patella
- Independent anchors prevent rotation of the brace and provide a "True" and consistent pull on the tibia avoiding lateral subluxation
- Adjustable buttress allows for custom degree of support
- Available with aluminium polycentric hinge for medial/lateral support and hyperextension control

REACTION KNEE

INDICATIONS

Recommended for acute mild to moderate anterior knee pain, support for patella instability, lateral subluxation and maltracking.

CHARACTERISTICS

- Patented dual durometer (silicone) buttress system provides consistent corrective force on the patella
- Bifurcated strap dynamically pulls the patella into proper alignment
- Semi-flexible removable nylon hinges included
- 21cm long support giving maximum power to pull patella into alignment
- Fabric is hypoallergenic, breathable, and lightweight
- 6 month warranty

DONJOY
PATELAX

INDICATIONS

Support and compression following injury to the patellar tendon. Proprioceptive and neuromuscular stimulation through compression. Overuse injuries such as Osgood-Schlatter disease, patellofemoral pain syndrome, patellar tendinitis and patellar maltracking.

CHARACTERISTICS

- Anatomical 3D knit design helps provide effective and targeted compression (20-36mmHg, medical standard) and support
- Breathable, elastic, soft knit for enhanced wearing comfort
- Stretch zones over the patella and the back of the knee for added breathability, comfort, and freedom of movement
- Compression-reduced edges help divert pressure at the ends of the support to provide a comfortable fit
- Anatomically contoured knee pad aid stability of the patella, massaging effect, and to help improve proprioception
- Patellar strap with pad helps relieve tension on the patellar tendon

LATERAL J

INDICATIONS

The tubular Lateral "J" buttress is ideal for supporting lateral patellar subluxation, dislocations or lateral patellofemoral malalignment.

CHARACTERISTICS

- "J"-shaped buttress for patellar stabilisation
- Lateral to medial strapping for additional stabilisation
- Drytex material for patients with allergies or irritations to neoprene

PERFORMER PATELLA KNEE

INDICATIONS

Mild or moderate ligament joint pain, sprains, strains, Osgood Schlatter disease, or patellar instabilities

CHARACTERISTICS

- Compressive neoprene support
- Thigh and calf straps provide additional support and compression
- Sewn-in horseshoe pad for additional patellar support
- Available with spiral stays or removable aluminum dual-axis hinges

GENUFORCE

INDICATIONS

GenuForce's contoured knee pad helps protect and support the patella, while its flexible bilateral stays help provide relief and stabilization for the knee joint.

CHARACTERISTICS

- Support and compression following acute and chronic knee injury and mild knee osteoarthritis
- Proprioceptive and neuromuscular stimulation through compression
- Patellofemoral pain (knee pain)
- Mild knee instability
- Prevention of injury
- Anatomical 3D knit design to help provide effective and targeted compression (23-32mmgh, medical standard) and support

DONJOY

FORTILAX KNEE

INDICATIONS

Support and compression following acute and chronic knee injury and mild knee osteoarthritis. Proprioceptive and neuromuscular stimulation through compression. Prevention of injury

CHARACTERISTICS

- Anatomical 3D knit design to help provide effective and targeted compression (20-36mmHg, medical standard) and support
- Lightweight, breathable, elastic, soft knit for enhanced comfort
- Stretch zones over the patella and the back of the knee to aid breathability, comfort, and freedom of movement
- Low profile
- Not made with natural rubber latex
- Easy to clean, machine washable

DONJOY

PERFORMER KNEE SUPPORT

INDICATIONS

Mild arthritis, knee sprains, strains, meniscal tears, and temporary relief from inflammation and joint pain.

CHARACTERISTICS

- Streamlined design for even compression and support
- Neoprene construction retains body heat for warmth and comfort
- Open patella reduces direct pressure on kneecap

ACTYTOE

INDICATIONS

- Pain relief in patients with symptomatic Hallux Valgus (bunion)
- Mild or moderate mal-positioning of the big toe
- Maintaining position after Hallux Valgus (bunion) surgery

CHARACTERISTICS

- Low-profile design
- Locking clip for splint immobilization (0° and 30° dorsi- and plantar flexion)
- Memory foam cushion
- Adjustable correction angle (0° and 10°)
- Adjustable, thin and soft straps
- Anatomically contoured splint
- Breathable and lightweight materials
- For day and night wear
- Suitable for walking
- Available in 3 sizes (S, M, L)
- For left and right foot
- Can be worn with wide footwear
- Not made with natural rubber latex

ACTYTOE LIFT

INDICATIONS

- The mid-foot brace is designed to lift the mid-foot bone and support transverse arch, helping provide pain relief for conditions such as:
- Hallux Valgus
- Splay foot, flat foot (fallen arch)
- Metatarsalgia

CHARACTERISTICS

- Low-profile design
- Adjustable strap with hook and loop fastener
- Cushioning arch support pad
- Universal size
- For left and right foot
- Can be worn in a shoe
- Not made with natural rubber latex

SOFT TOES TOE CUSHION

INDICATIONS

- Helps to relieve pain in the toe area
- Helps to reduce pressure on the toes and metatarsal heads
- Helps to maintain the toes in good position

CHARACTERISTICS

- Light menthol scent for a fresh smell
- Soft touch for greater comfort
- Durable, easy to clean and reusable
- Lightweight, skin-friendly materials, hypoallergenic, PVC free
- Supplied coated in talcum powder for initial ease of application and comfort
- One size fits most
- Not made with natural rubber latex

AIRCAST

ACTYFOOT™

INDICATIONS

Designed to provide support, stabilization and partial immobilization of the ankle. Acute lateral ligament injuries. Acute ankle sprains and ligament ruptures. Prevention of further injuries in pre-operative chronic ankle instability. Protection of ankle joint

CHARACTERISTICS

- Three integrated straps provide proprioceptive feedback and work together with semi-rigid elements to stabilize the ankle and restrict excessive range of movement.
- Detachable lateral stay allows brace to be modified for use in both acute and chronic injury phases
- Low profile. Fits in most shoes or trainers and can be worn over a sock for additional comfort
- Can be fully opened to allow simple, secure application
- Calf strap provides additional stability to the ankle joint to help improve overall balance and control
- Cross strap further helps minimize the risk of ankle inversion
- Forefoot strap allows wearer to adjust compression as required to help manage swelling

ACTYLIGHT

INDICATIONS

- Initial management of chronic ankle instabilities
- Mild to moderate sprains of the lateral ligament
- Isolated syndesmotic injuries (Grade 1)
- Return to sports, prevention of re-injury
- Ligament instability
- Supination prevention

CHARACTERISTICS

- Step-in design makes donning and doffing quick and easy
- Secure lace-locking mechanism enables precise tightening, helps maintain a consistent fit, and allows quick release
- Lightweight, breathable fabrics help the foot stay cool and dry to aid compliance
- Figure-8 straps provide inversion/eversion control
- Anatomical contoured bilateral stays provide additional stability and protection and can be repositioned to accommodate the malleoli
- Fits inside a trainer comfortably allowing patients to stay active
- Modular design means the support can be adapted easily for acute or chronic use by removing the stays

MALLEOFORCE

INDICATIONS

Post-op or post-traumatic use, chronic soft tissue inflammation, chronic instability, sprains, moderate ligament injuries, recurrent swelling, load-related pain in foot and ankle.

CHARACTERISTICS

- Silicone inserts protect the malleoli and provide a massaging effect
- Anatomical shape of heel profile provides support and correct fit
- Correct ankle flexion angle for a perfect fit
- Soft yarn and knit pattern do not hinder ankle flexion
- Fits left or right ankle
- Anatomical 3D knit design to help provide effective and targeted compression (23-32mmHg, medical standard) and support

Acute ankle distortion grade I, II & III, post-operative application, chronic ankle instability.

CHARACTERISTICS

- Semi-rigid, anatomically designed shells for protection, comfort and the prevention of inversion/eversion
- Patented Duplex aircell system to enhance circulation and reduce swelling
- Pre-inflated aircells for easy application
- Streamlined to fit in shoes for early protected weight-bearing
- Latex free
- 6 month warranty

DONJOY

OSTEOSTRAP

INDICATIONS

- Osteoporosis
- Stable vertebral fractures
- Dorsal hyper-kyphosis
- Osteoarthritis
- Traumatic fractures
- Postural dysfunction associated with Parkinson's disease
- Muscular weakness

CHARACTERISTICS

- Reverse shoulder straps allow adjustable tension
- Semi-rigid aluminum dorsal frame can be molded to fit the individual curvature of the back
- Adjustable lumbar belt uses accessible finger pockets and strap tabs

MYBABYSTRAP

INDICATIONS

- Lower back pain
- Pelvic pain
- Sacroiliac pain
- Postural instabilities
- Discomfort due to stretching and expansion of the abdomen
- Back support after birth

CHARACTERISTICS

- Modular design is adaptable to all stages of pregnancy and also after birth. Easy to adjust
- Adjustable back pad for additional support and compression in the back area
- Four posterior rigid stays for extra support in the lumbar area
- Bilateral straps for adjustable relief
- Anatomical shape follows the natural contours of a pregnant body for an improved fit, with no pressure on the abdomen
- Thin, soft and breathable fabric for a comfortable fit
- Ergonomic front panel
- Easy-to-use with simple, hook-loop closure
- Removable elastic strap

DONJOY

CONDILAX

INDICATIONS

Support and compression following elbow injury and mild elbow osteoarthritis. Proprioceptive and neuromuscular stimulation through compression. Prevention of injury. Elbow strains or sprains. Medial or lateral epicondylitis. Tendinopathies

CHARACTERISTICS

- Epicondyle pads help provide support and pressure relief for the elbow
- Anatomical 3D knit design to help provide effective and targeted compression and support
- Removable and adjustable strapping helps to control the degree of stabilization and compression
- Lightweight, breathable, elastic, soft knit for enhanced comfort
- Stretch zones in anterior elbow area to aid breathability, comfort, and freedom of movement
- Not made with natural rubber latex
- Easy to clean, machine washable

EPIFORCE STRONG

INDICATIONS

Epicondyle/ligament and tendon related trauma/injury
Medial or lateral epicondylitis (e.g. golfer's elbow, tennis elbow)
Elbow pain due to overuse, chronic inflammation

CHARACTERISTICS

- Removable pad stimulates the painful tendon insertion on the inner or outer side of the elbow to help relieve pain and regain mobility
- Adjustable strap for precise application of pressure; increase during activity, decrease during rest
- Slap band for easy one-handed application
- Buckle closure for ease in donning and doffing
- Anatomical design for optimal fit
- Low profile to facilitate use under clothing
- Lightweight for comfortable use every day
- Fits left or right arm

PAIN MANAGEMENT AND MUSCLE STIMULATION SYSTEMS

Chattanooga is the world's largest manufacturer of rehabilitation equipment for treating musculoskeletal, neurological and soft tissue disorders. For over 75 years, Chattanooga has set a benchmark for leadership, reliability and excellence. Our products contribute to better treatment outcomes in hospitals, clinics and home settings worldwide. We lead the physical therapy industry by example and, through continuous innovation, provide real world solutions for clinicians and their patients.

As the world's leading brand in rehabilitation, Chattanooga is sold in over 80 countries worldwide. Our Chattanooga customers are supported for order placement, training, product delivery and after sales service by a dedicated team of highly skilled Enovis employees.

CHATTANOOGA

CEFAR TENS

INDICATIONS

Combines TENS with NMES to bring pain relief and muscle rehabilitation from the clinic to the home.

CHARACTERISTICS

- 10 preset treatment programmes, plus 5 open slots
- 1+1 Function: Perform a treatment using two different programmes simultaneously
- Programme lock, compliance, pain score record
- Large easy to read backlit screen
- Mains rechargeable battery. Fully charges in 90 minutes and charge will last 6-10 hours
- 3 year warranty

CHATTANOOGA

CEFAR BASIC

INDICATIONS

Cefar Basic offers TENS programs for most of the common pain indications. Cefar Basic has 3 preset treatment programs: TENS Conventional, TENS Burst and Modulated TENS (pulse width) programs.

CHARACTERISTICS

- Cefar Easy Touch™: Automatic Intensity Adjustment - At the press of a button, the intensity is automatically set and adjusted according to the results of the Auto test analysis. Cefar Easy Touch™ makes treatment easier and ensures stimulation takes place at an optimal and effective level
- Backlit Screen: The Cefar Basic has a larger screen and the backlight makes it much easier to read, even if the surrounding light is poor. Other advantages: pause function, program lock, key lock, compliance, self check
- 3 year warranty

HOT & COLD THERAPY

THERATHERM® DIGITAL MOIST HEAT PACK

INDICATIONS

The Theratherm® Digital Moist Heating Pad is intended to provide moist heat therapy for body surfaces. It is capable of maintaining an elevated temperature during use, and temporarily relieving minor muscular or joint pain.

CHARACTERISTICS

- Convenient preset time and temperature with on board auto shut-off safety feature and audible buzzer
- New larger easy-read digital hand control for operation, programming, temperature and/or treatment time with new back lit display with one button activation
- Unique and responsibly sourced porous sand retains moist heat while conforming to the body with no chemicals
- Lockout mode protects against inconsistent setting changes throughout treatment sessions
- Moist heat therapy temperatures range from 113° to 167°F (45° to 75°C)
- Treatment sessions up to 30 minutes
- Specially designed flannel cover for efficient moisture retention
- One-year warranty

CHATTANOOGA

HYDROCOLLATOR® HOTPACS™

INDICATIONS

Hydrocollator Moist Heat HotPacs are the first choice for physiotherapists, physicians, chiropractors, athletic trainers and kinesiologists for over 60 years. Chattanooga is the inventor of the original Hydrocollator HotPac and proud to still be producing this all natural product today. The benefits of moist heat therapy over dry heat are well established for pain relief due to arthritis, myofibrosis, back pain, muscle strains and spasms.

CHARACTERISTICS

- Seven HotPac sizes designed to fit every body contour
- Provides up to 30 minutes of deep, soothing, moist heat
- Tabs on most HotPacs for easy rotation in busy clinics
- Cost effective, provides hundreds of treatments from one HotPac
- All natural pack containing bentonite, a natural hydrocolloid filling, wrapped in a woven cotton blend
- One year warranty

**COMPEX MUSCLE
STIMULATION SYSTEMS**

CompeX® muscle stim trains your muscles in a way that traditional workouts alone cannot. It is a “best kept secret” that many elite athletes and fitness enthusiasts use to enhance their workouts, training and recovery programs.

Muscle stim is not a miraculous technique, it is very simple and precisely reproduces the processes that occur when the brain orders muscles to contract by sending electric pulses to your motor nerves in order to create muscle contractions. It respects how the body works.

COMPEX

SP 8.0/WOD

INDICATIONS

Our top of the range wireless stimulator designed for athletes who train and compete on a regular basis. SP 8.0 includes our brand new MI-Autorange feature that continually brings you better results

CHARACTERISTICS

- Recover faster

COMPEX

FIXX 2.0 MASSAGER

INDICATIONS

The CompeX Fixx™ 2.0 massager helps warm up muscles before a workout and relieves stiffness after a hard session. Five powerful intensity settings, paired with a high stall force, give the intense pressure needed to relieve the toughest spots safely and comfortably. Interchangeable tips (included) and a rotating head help tailor you massage to the specific needs of different muscle groups. Removable and rechargeable batteries, a compact design, and quiet motor help provide relief anywhere and everywhere.

CHARACTERISTICS

- 5 interchangeable tips
- LED screen display with power and battery level
- 3 arm position options
- 5 speeds: 16, 25, 33, 41 and 50 strokes per second
- Amplitude: 16 mm
- Weight (with battery and tip): 1.3 kg
- Battery life: 2 hours
- Quiet motor: Less than 60 dB
- Powerful motor: Twice the power of Fixx 1.0
- Includes: 1 CompeX Fixx 2.0 massager · 1 premium travel case
- 1 lithium ion battery · 1 power adapter · 1 charging dock · 5 tips
