PSI PLUS

The versatile  
choice for shoulder  
recovery

# DONJOY®

## PSI PLUS

### The versatile choice for shoulder recovery

PSI Plus delivers efficient shoulder immobilization with patient comfort in mind. This adaptable DonJoy® shoulder support accommodates both left and right arms through its repositionable upper-arm strap. Healthcare professionals appreciate its versatility, while patients benefit from the lightweight, open design that enhances wearing comfort during post-operative recovery.

#### INTENDED USE/INDICATIONS

The DonJoy PSI Plus Shoulder Immobilizer is designed to support and immobilize the shoulder following injury or surgery.

#### FEATURES AND BENEFITS

##### Bilateral design

- Converts from left to right arm use by repositioning the arm and shoulder strap, reducing inventory needs and increasing versatility

##### Quick-access hand pocket

- Supports the forearm in internal rotation while allowing clinicians to perform examinations without removing the entire sling

##### Intuitive strap configuration

- Reduces application time and minimizes the risk of incorrect positioning for both clinical staff and patients

##### Adjustable shoulder strap

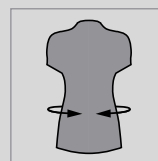

- Quick-release mechanism enables single-handed removal and attachment for patients

##### Lightweight, open design

- Promotes air circulation to reduce heat buildup
- Enhances patient comfort for extended wear periods, supporting treatment compliance

PART NUMBER	WAIST CIRCUMFERENCE	SIZE
82-7440	< 115 cm	Standard
82-7441	115 – 160 cm	Large
